

In this section we publish interesting [articles](#) from the Seminary magazine "Word", excerpts from [diploma dissertations](#) of our graduates and [other interesting materials](#), as well as electronic books, digitalized by our seminarians.

The most important for us is the project ["Digitalized tradition"](#). In XX century our country and Ukrainian greek-Catholic Church suffered a lot from Soviet regime. In the period of persecution many our cultural goods were destroyed. It was illegal to have religious books in the home; everyone who kept them was running risk to be arrested. As a result now there is very small quantity of our old religious literature in our country.

To preserve our ecclesial tradition and religious legacy we decided to digitalize old liturgical, canonical, spiritual and theological books of our Church. Our seminarians look for this kind of books in private libraries and borrow them to make a digital copy. The books to digitalize are old, therefore they have no copyrights. We plan to publish them on our internet site. This project is very important as soon as it will save our tradition and history by making it more accessible and known for future generations.
